Objective

I’m a Full Stack Developer with 3 years of experience building reliable web and mobile applications. I deliver high quality work on time, communicate clearly, and adapt quickly to project needs. I focus on creating solutions that work smoothly and meet client goals.

Experience

- **Rooche Digital IT Solutions Inc.** June 15, 2026 - October 5, 2026
  Full Stack Developer - (Project Based)
  Worked as the main Full Stack Developer for Wingman client projects, primarily the Webinar System and Remote Professional Lunchpad (RPLP) system, developing and maintaining features using Next.js, React.js, Express.js, and PostgreSQL, handling tasks from development and testing to production deployment using Netlify for frontend and Railway for backend and database services.

- **CressJane Web Designs and Development Services** January 2026 - June 2026
  Web/Android Developer (WFH - Remote)
  Experience in developing and maintaining the Defenders Admin Dashboard using Next.js with TypeScript and Node.js APIs, handling user management, authentication, and CRUD operations. Connected frontend features to backend endpoints, managed data and errors, and ensured a secure, responsive, and reliable system.

- **TinkerPro POS Information Technology** August 2025 - January 2026
  Software Developer
  Experience in full stack development and application support for a BIR accredited Restaurant POS system, handling table management, table selection, additional orders, billing, and payment processing. Supported kitchen order routing and receipt printing using ESC/POS (MIKE 42) for 58mm and 80mm thermal printers, including cloud and local online printing. Also worked on an order taker web and mobile app connected to the main restaurant POS for real-time order synchronization.

- **Empireone BPO Solutions Inc. (San Carlos City)** August 2024 - October 2024
  OJT – Web Developer & IT Support
  I built web apps using PHP (Laravel), MySQL, HTML, CSS, JavaScript, Tailwind, and React.js. I worked on features like user login, dashboards, and user management. I also fixed bugs, improved existing code, and created a system called Aux Tracker to monitor agent activities.

  As IT support, I helped with hardware and software issues, maintained office devices, monitored the network, and assisted with email setup. This experience improved my coding, problem solving, and teamwork skills.

- **(Freelance)** February 2022 - Present
  Web/Android Developer

Developed and delivered web and mobile applications using React, Laravel, Flutter, Kotlin, Java, and React Native. Built user friendly interfaces and integrated APIs, authentication, real time data, and local storage, connected to reliable backend systems. Successfully provided full stack solutions tailored to client requirements, ensuring quality and on time delivery.

Education

- **Central Philippine State University (San Carlos Campus)** 2024/2025
  Bachelor of Science in Information Technology
  College Graduate

Skills

- Frontend: HTML, CSS, JavaScript, React.js, Next.js, Typescript,. Angular, Vue.js, Tailwind, Bootstrap
- Backend: PHP, Laravel, Node.js, Express.js, REST APIs, CodeIgniter, Prisma, Python, Django, Flask
- Mobile: Flutter, ExpoGo, React Native, Kotlin, Java
- Database: MySQL, Firebase, MongoDB, PostgreSQL, SQlite
- Tools: Git, GitHub, Gitlab, Postman, Vscode
